SWALLOW EVACUATION

Evac-track

The Evac-track is an evacuation device used to move people with a disability or injury down stairways quickly and safely during an emergency. Its patented speed governor and braking system allows a small attendant to easily evacuate a larger passenger.

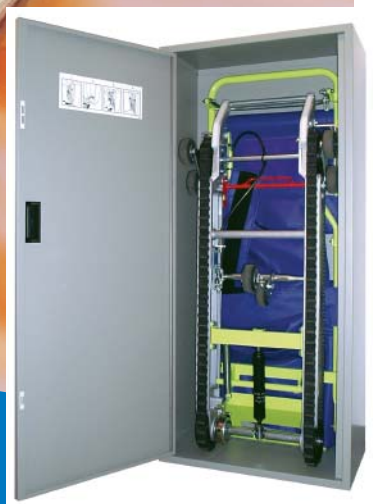

In an emergency such as a fire or an earthquake, elevators should not be used. People with limited mobility may be trapped. Evac-track provides a lifeline to safety.

Features

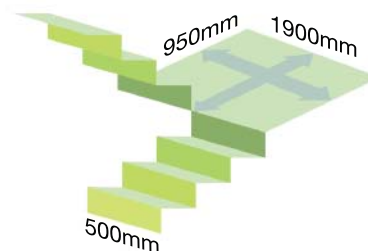

- Quick and easy set up for immediate use
- Carries up to 136kg
- Passengers weight moves unit down stairs, while the governor controls speed
- Failsafe brake brings unit to a complete stop automatically
- Adjustable safety straps
- Stable and self-supporting
- Unique seat design allows easy transfer from wheelchair
- Durable tracks grip stairs securely
- The track grips the stairs, regardless of the stair construction material

Benefits

- Provides quick and safe emergency evacuation
- No hand carrying of mobility impaired persons
- Small attendants can easily move heavier passengers
- Easily stores in a secure area when not in use
- Requires minimal maintenance

Capacity	136kg
Dimensions	1310 x 426 x 810mm
Dimensions collapsed	1100 x 426 x 270mm
Weight	21kg
Speed	1.1m/sec
Stair angle max	40°

Minimum
stair-landing
